DIGITAL SKILLS ACCELERATOR

WHO WE ARE?

G-CITI CAPACITY SKILLS is the corporate workforce training arm of G-CITI Campus. The company, ICT Training Consultants was registered as a PTY Limited in 2017. Llewellyn Scholtz has 20 years within the ICT Training industry and are leading G-CITI Campus as an Academy Training College and leading Genesis Community IT Initiative (non-profit) in partnership with the Department of Economic Development with various ICT Catalyst initiatives (I-CAN Centre). Llewellyn Scholtz advocates digital inclusion in local communities with the I-CAN Centre, empowering youth with vocational digital skills as an Academia Training College and providing the current workforce with digital skills to enhance productivity and readiness for the 4th Industrial Revolution.

WHAT WE DO?

The success of any organisation relies on the performance and capacity of its workforce. **G-CITI CAPACITY SKILLS** offers onsite / in-house ICT international training programs to organisations who see the value in developing the skills and competencies of their staff. In-house training programs are done at the organisation's premises to groups of 20 or more. We are a fully accredited MICT SETA learning provider with a core focus on cross-industry, cross-modal, technical and soft skills learning solutions. We have an onsite accredited exam centre for Certiport, PearsonVUE and Prometric and we offer exams for various product types, including Microsoft, Huawei, CompTIA, EC-Council, CIMA, AutoDesk and many more.

HOW WE DO IT?

Our services include Classroom-based training, Blended Learning Solutions, e-Learning Courseware Development, Standard Catalogue courses, Specialised courses and a fully-fledged Learning Management System. Our Blended Learning approach enables organisations to up-skill their staff on the latest technologies easily, effectively and efficiently using multiple training methods and our training solutions are focussed on helping employees gain the knowledge that is necessary in becoming effective contributing members of your workforce.

Certiport is dedicated to helping people succeed through certification. Their globally recognized credentials are aimed at enhancing individual productivity, marketability, and value. Certiport works with industry-leading certification providers to bring their programs successfully to market. Certiport manages a sophisticated portfolio of leading certification programs including: Adobe Certified Associate (ACA), Autodesk Certified User (ACU), Autodesk Certified Professional (ACP), Internet and Computing Core Certification (IC3), Microsoft Office Specialist (MOS) and Microsoft Technology Associate (MTA).

THE VALUE OF CERTIFICATION?

As the world moves to a global economy with easier movement of employees and increased competition, there is a technology skills gap that can be felt in almost every country. **The current IT Skills and Salary Report from Global Knowledge** confirms that skills gaps are a global concern. The increased need to match employer needs with workforce skills points out the value of certification. Certification, particularly entry-level and vocational certification, helps to build a skilled workforce that meets the needs of local employers and government tech initiatives. By offering the right balance of academic excellence and real-world skills, you can give students the confidence and motivation they need to succeed both in school and in a profitable career. Adobe asked current and aspiring digital media professionals about the essentials for launching a successful digital media career. When asked what would make a digital media professional's resume stand out in lieu of experience, 61% said a demonstrable knowledge of digital design tools and 44% said digital media certifications from a top-tier company. The entire survey field agreed that certifications can help candidates prove their skills to prospective employers. In a Microsoft Certified Professional survey, 91% of hiring, the value of certification will allow "professionals to prove their proficiency using certain tools, positively affecting the likelihood of those professionals to get hired, not only at a national level but also internationally."

SHORT COURSES

Microsoft Office Specialist

COURSE	VERSION
Access	2013 2016 2019
Excel	2013 2016 2019
PowerPoint	2013 2016 2019
Outlook	2013 2016 2019
Word	2013 2016 2019

Microsoft Technology Associate

COURSE
Cloud Fundamentals
Database Administration Fundamentals
HTML5 Application Development Fundamentals
Introduction to Programming using HTML and CSS
Introduction to Programming Using Java
Introduction to Programming Using JavaScript
Introduction to Programming Using Python

Key Applications	
Living Online	

Traditional jobs are being replaced by technology and new digital careers have started to emerge.

To achieve digital workforce transformation, organizations must create a culture that enables change in order to accelerate and sustain transformation across the business.

CERTIFICATION & LEARNING METHODOLOGY

LEARN

During the learning process, candidates watch videos, conduct online assessments based on the specific topic. Furthermore, an e-book is available to read and learning activities are introduced to ensure candidates understand each topic. Alternatively, the learning process can only be direct-facilitation with a textbook. Therefore our learning approach embraces both online learning and blended learning.

PRACTICE

This process is focused on preparing the candidate for the vendor international exam. It includes both Practice mode and Practice mode or Test mode. The testing mode has a range of questions (various assessment approaches - multiple choice / True - False / Matching Items / Fill in the missing word Screenshots with drag and Drop), to ensure that the candidate are assessed accurately and fairly. The Prepare Mode are questions directly related to the final exam. Since the exam is 45 minutes and answering 40 questions, it requires students to be effective and efficient during the exam. The Prepare Mode ensures that students will answer correctly and quicker within a set time frame.

CERTIFY

The Certify process is where students writes the international exam online at a Certiport Testing Centre.
